# THE STOCK MARKET GAME™

## What is The Stock Market Game?

The Stock Market Game is an innovative, fun, and experiential learning approach to developing math and economic skills utilizing a highly motivational program. Students work in teams to invest \$100,000 of virtual money in the stock market through an online portal, while also practicing key mathematics principles in real-world scenarios. Teams in Minnesota compete to have the highest valued portfolio at the end of their session, motivating students to think critically about their investments.

## Benefits of SMG in Math Classes

- **Students can manage their online portfolio anywhere** they have access to a device and internet, making it a great learning tool for in-person or remote teaching.
- **Students apply and practice simple and complex mathematical concepts** by using data in their SMG portfolio.
- **Teachers have access to dozens of resources** focused on teaching mathematics, including lesson plans, activities, and assessments and have flexibility in how frequently they use it in class with students.
- **Request a live or recorded presentation from a guest speaker** who can talk with students about how math is used in the real world in various careers and businesses.

## Participate in SMG: Session Dates 2021-22

**YEAR LONG:** Now through April 22, 2022

**SPRING:** January 18 to April 29, 2022 **LATE SPRING:** March 7 to May 27, 2022

**Thanks to funding from FINRA, SMG team fees will be waived for the 2021-2022 school year!**
